FLEXIBLE ADDITIVE FOR ADHESIVE AND GROUT

SUITABLE FOR INTERNAL AND EXTERNAL USE

Granfix Flexible Additive is a low viscosity white liquid (water-based polymer emulsion) for use with all Granfix cement-based adhesives and grouts, namely Granfix white and grey C.F.T.A. Granfix Rapid Set, White & Grey Granfix Fast Set, Granfix Wall Tile Grout and Granfix Floor Tile Grout.

Granfix Flexible Additive improves the adhesion properties especially beneficial when fixing dense or impervious ceramic tiles and mosaics, including marble and terrazo. Strongly recommended when fixing onto glazed surfaces such as tile on tile, also on dense concrete and onto timber surfaces such as floors or boxed-in pipework.

Granfix Flexible Additive reduces the water permeability of the modified adhesives and grouts and is particularly beneficial for areas which will be subjected to the presence of water such as commercial shower areas, swimming pools or exterior fixings.

Granfix Flexible Additive will help flexibalise the adhesives and grouts providing greater resistance in installations where the tiling may be subjected to limited vibration or movement.

Minimises the risk of efflorescence.

INSTRUCTIONS FOR USE

After preparing the surface to be tiled and ensuring all loose particles are removed and any grease, oil or dirt is cleaned away thoroughly the surface should be primed using Granfix Acrylic Bonding/Priming Agent.

Add the Granfix Flexible Additive into the mixing vessel with clean water (dosage rate is 2.5 litre per 20kg bag of adhesive or grout or proportioned accordingly to amount of adhesive required). Add the powder adhesive or grout and mix to the working consistency required.

20kg of powder requires 5 litres total liquid
(Dilute 2.5 litre of Flexible additive with 2.5l of water to give correct strength)

APPLICATION

Apply the adhesive as normal in the conventional manner. Fix the tiles with a slight twisting action to ensure good contact with tile and adhesive.

Remove any adhesive from the tile surface or tools whilst it is still wet, using a damp cloth.

SPECIAL NOTE

The addition of Granfix Flexible Additive to either adhesives and grouts will extend the final setting times.

STORAGE

In original containers in a cool dry place. PROTECT FROM FROST. Store at temperatures between 5°C-30°C. This product has a shelf life of at least twelve months.

PACKAGING

1 litre, 2.5 litre and 5 litre containers.
